Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Response to Arguments

1. Applicant's arguments with respect to claims 24-28 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 24 – 28 are rejected under 35 U.S.C. 102(b) as being anticipated by Onuma Takashi (JP 02-131226).

Regarding claim 25, Onuma discloses a lens device comprising: an inherent camera interface board that conforms a lens control signal to a predetermined data format (predetermined voltage and polarity for controlling a stop) of the lens device, wherein the lens device is attachable to plural cameras employing different data formats (voltages and polarities) for lens control signal (for controlling aperture stops), wherein the data formats differ by at least control voltage and polarity, and wherein the lens device is attached to one of the cameras, and

Art Unit: 2615

the lens control signal is received from the attached camera(s) (see Fig. 2; Abstract and note that the lens must have a circuit board for mounting and driving electrical components in order to function as disclosed).

Regarding claim 26, the lens control signal is iris control (aperture stop).

Regarding claim 27, it is clear that the lens control signal is one of a digital signal and an analog signal (see Abstract).

Regarding claim 28, Onuma also discloses a camera code switch (8, 3) for switching an interface in the camera interface board in accordance with attached camera kind (see Abstract, wherein processing program of the arithmetic processing circuit 3 indicates digital environment that must contains digital codes).

Regarding claim 24, also disclosed is a camera connected to the lens device (Figs. 1 & 2 and Abstract).

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit: 2615

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
